

Baby Growth Timeline

Baby Born

The length of a normal pregnancy can be anything from 37 weeks to 42 weeks.

about
40weeks

1.5 - 3
Months

Your baby's first real one will make an appearance somewhere between one and a half to 3 months of life.

First Smile

Grasping

Start working intensively on this skill by 3 months and make leaps with each passing month.

from 3
Months

4 - 7
Months

Your baby will probably learn to sit independently between the ages of 4 and 7 months.

Sitting

Crawling

Most babies learn to crawl between the ages of 7 months and 10 months.

7 - 10
Months

10- 12
Months

Most babies take their first steps sometime between 9 and 12 months and are walking well by the time 14 or 15 months old.
