

successful flower and good  
marriage, excellent varieties  
in the present.

# Flowers in the Wind

They are known as sunny and hardy, and have many kinds of short branches that have the function of reproduction. Typical flowers, on a limited growth of a short axis, the male and female of the calyx, petal, and generative cells. Flowers are composed of corolla, calyx, receptacle, and stamens, with all kinds of colors, some of which are very showy and fragrant.
