

Rehabilitation Center Layout

Rehabilitation hospitals are inpatient facilities where patients can receive acute care such as physical therapy, occupational therapy, speech therapy, and other treatments aimed at helping patients regain functional and cognitive abilities following events such as strokes, spinal cord injuries, brain injuries, hip replacements, and other conditions. In rehabilitation hospitals, patients can also get help from social workers and get neuropsychological treatment.

A free customizable **rehabilitation center layout** template is provided to download and print. Quickly get a head-start when creating your own rehabilitation center layout with **EdrawMax**. Edraw is a great floor plan design tool helps you visualize your design ideas both for personal and for business use.
