

A3maly Server Activation Functional Flowchart

A **flowchart** is a depiction of a process in graphical or symbolic form. Each phase of the procedure is represented by symbols. A lot of flowcharts have short descriptions of each phase. The majority of individuals utilize arrows to connect distinct steps and to represent the flow of a process.

There are a few types of flowcharts that are widely used. Ovals, for example, symbolize the start or finish of a process, rectangles represent a procedure, diamonds represent a decision, and arrows reflect the sequence in which steps should be completed.

Try to find a server activation flowchart template? This one can be downloaded and modified to represent your own server activation flowchart. Download it now or open **Edraw flowchart software** to discover more flowchart examples.
