

## Edraw Smart Shapes

- In version 6.0, Edraw add a series of smart shapes. These shapes have smart features, can be changed number of the items and calculate the items' position by themselves.
- These shapes include List Shapes, Process Shapes, Circular Shapes and Matrix Shapes.
- For every smart shape, there are variety of changes. Following is an example.

Easy to use

Edraw smart shapes are a set of efficient library. Dynamic and automatical features help user finish their works more fastly.

Can insert or remove item

Click the shape action menu to add or remove an item of the shape. Also can select one of the items and click the item action menu to insert a new item or remove current item.

Arrange automatically

As adding or deleting a item, other items of the shape will generate new position automatically.

Generate color automatically

As adding a new item, it will generate and apply a set of color like other items.

Only one click to change color

Select the shape or one item of the shape, click the color bar to change the colors of the shape or item.
