

Spring Tree Care:

1. Clean up

Kick off the new growing season with a quick spring cleaning - for trees.

2. Mulch

A layer of mulch helps soil retain moisture and suppresses weeds.

3. Water

Wait until soil thaws to tackle watering chores.

4. Prune

The ideal time to prune most trees is during winter dormancy.

5. Diseases

Check with local extension agent to learn which diseases pose the most serious threat to your trees
