

Zoology

General Concepts

- Belongs to Biology
- Embryology
- Classifications of animals
- Living and extinct
- Ecosystems
- Come from Greece

History

- Ancient**
 - 1 Natural history
 - 2 Aristotle and Galen
 - 3 Muslim physicians
 - 4 William Harvey
 - 5 Cell theory
 - 6 Mechanical philosophy
 - 7 Scientific subjects
 - 8 The mutability of animals
- Recent times**
 - Charles Darwin
 - Morphology
 - Spontaneous generations

Zoography

- Descriptive zoology
- The analysis of habitats

Comparative Anatomy

The structure of animals

Ethology

- The analysis of animals' behaviors
- Behaviourism

Behavioral Ecology

Ecological pressures

Soil Zoology

- Soil fauna
- Came from the UK

Molecular Biology

- Common genetic
- Developmental mechanisms

Evolutionary Biology

- Population genetics
- Mendelism

Palaeontology
